

TELECOMMUNICATIONS AUTHORITY OF TRINIDAD AND TOBAGO

NOTICE TO ALL INTERNET CAFÉ OWNERS / OPERATORS

The Telecommunications Authority of Trinidad and Tobago (the Authority) is currently undertaking an initiative to develop a Universality Implementation Plan. This Plan will facilitate the availability and accessibility of basic affordable telecommunications and broadcasting services to all persons in Trinidad and Tobago.

The process towards developing the Plan includes designing a survey to measure the **digital divide** in the country. The results of the survey will aid the Authority in assessing current availability and accessibility of basic telecommunications and broadcasting services, including Internet services, to all areas of Trinidad and Tobago.

In this regard the Authority is inviting operators/owners of all Internet cafés within Trinidad and Tobago to register relevant contact information with the Authority. The information gathered from Internet café operators/owners will assist the Authority in compiling the sample database that will facilitate the implementation of the survey.

Registration forms are available at the Authority's website www.tatt.org.tt or at the offices of the Authority.

Forms should be completed and delivered to the offices of the Authority no later than 2nd April, 2007.

The Authority looks forward to the co-operation of all Internet Café owners/operators in this exercise.
